

FIRST ANNOUNCEMENT

The conservation of native crayfishes is one of the major challenges in inland waters of Europa. Most species are endangered by many factors, but specifically by introduced species and pests. This symposium will focus on recent research advances, and also on management strategies and specific experiences to achieve a long term conservation of our native freshwater decapods.

Scientific Committee

Javier Diéguez-Urbeondo, CSIC, Spain
Leopold Fureder, University of Vienna, Austria
Lennart Edsman, Stockholm, Sweden
Laura Aquiloni, University of Florence, Italy
Satu Viljaus, Veterinary Institute, Helsinki, Finland
Japo Jussila, University of Kuopio, Finland
Pavel Kozak, Czech Republic
Fernando Alonso, Junta de Castilla La Mancha

Invited Speakers

Leopold Fureder, University of Vienna, Austria
Lennart Edsman, Stockholm, Sweden
Laura Aquiloni, University of Florence, Italy
Satu Viljaus, Veterinary Institute, Helsinki, Finland
Japo Jussila, University of Kuopio, Finland
Pavel Kozak, Czech Republic
Fernando Alonso, Junta de Castilla La Mancha

Open list of topics

- Crayfish biology and ecology
- Conservation programs
- Alien crayfish management
- Crayfish plague biology
- Conservation aquaculture
- LIFE projects on crayfish conservation

(Please, contact the organization to propose other topics)

Provisional program

- **Day one:** Oral presentations, Poster Session
- **Day two:** Oral presentations, Discussion Forum, Conference Dinner
- **Day three:** Technical Excursion

Registration fees and call for presentations
